Youri Janssen

Full-stack Software Engineer | AI-assisted development | IAM

I am a full-stack software engineer with experience in web development and Identity & Access Management. As a PHP Developer at WOW Media in Amsterdam, I build websites, intranet systems and content management systems. I have completed a variety of projects, a selection of which can be found at yourijanssen.nl. My IAM experience also includes learning to manage user accounts with NetIQ in a RHEL environment.

I translate user needs into practical solutions and take applications from initial concept to implementation. My background is in programming, complemented by experience designing in Figma and turning designs into code. I use AI tools and agents to accelerate development and automate repetitive tasks. I choose technologies based on the problem, with a focus on quality, maintainability and usability. I am looking for a full-time role in the Amsterdam area or a remote position where I can apply this approach from concept to delivery.

Experience

Wow Media — Amsterdam
Mid-level PHP Developer | 2026–Present — 2026 – Present
At WOW Media, I develop and maintain websites, web applications and intranets, working across both frontend and backend. I also manage servers on DigitalOcean. I have delivered several projects that are now live, including leroygrau.nl, dezorgheuvel.nl and tnls.nl, alongside various internal business applications. I use AI tools and agents to accelerate development and automate repetitive tasks while maintaining a focus on code quality, maintainability and usability.

Dienst ICT Uitvoering (DICTU), Confidential Information Department — The Hague
Junior IAM Engineer — 2025
As part of the IAM team in the Confidential Information department, I worked on identity and access management. I gained experience with NetIQ Identity Manager and Access Manager, VMware, and Linux server administration using Red Hat Enterprise Linux (RHEL 8). I also used Jira and Confluence for task management and documentation.

Working Talent — Amsterdam
IT-Trainee — 2025
At Working Talent, I completed an intensive training programme focused on software development, DevOps and professional skills such as communication and teamwork. I subsequently joined DICTU as an IAM Engineer through a secondment-to-permanent employment arrangement.

IRP (BIMkeeper) — Amsterdam
Stagiair — 2023 – 2024
At Working Talent, I completed an intensive training programme focused on software development, DevOps and professional skills such as communication and teamwork. I subsequently joined DICTU as an IAM Engineer through a secondment-to-permanent employment arrangement.

Residential Rental Management — Utrecht
Self-employed — 2017 – 2024
Managed room rentals under the Dutch resident-landlord scheme (*hospitaregeling*), including drafting tenancy agreements, negotiating with tenants and resolving disputes. Gained practical experience with tenancy legislation, tenants' rights and maintaining positive tenant relationships.
